EDUCATION

Shanghai Theatre Academy	Bachelor	Digital Art Design	Sept. 2025–Jun. 2028
Qingdao University	Master	Industrial Design	Sept. 2019–Jun. 2023

WORK EXPERIENCE

Shanghai Timewith Co., Ltd.	Mar. 2025–Jun. 2028	Product Design Intern
- Planned and designed brand brochures, e-commerce detail pages, and promotional videos; managed full-cycle production of marketing materials aligned with brand identity. Delivered 3 visual schemes that supported internal testing and were used in 2 exhibitions and online campaigns. - Optimized the mini-program homepage based on internal feedback about unclear navigation. Restructured information architecture and visual hierarchy with the dev team, unified icons, fonts, and colors, and reduced task completion time. Established a unified visual language as the design-to-development handoff standard. - Addressed feature-heavy but disconnected hardware by mapping user flows and streamlining voice interactions with the hardware team, lowering the learning curve. The proposal was added to the product backlog and led to a cloud-sync prototype, enhancing differentiation. After the voice flow simplification, user test success rates for independent operation rose significantly.		

PROJECT EXPERIENCE

Affective Interaction Design for Emotion Regulation

- Aiming at the broad demand for emotion-regulation tools, completed a full-process product design for an emotion-regulating app, integrating art therapy and Kansei Engineering theories.
- Through competitive analysis and user research, distilled core design requirements; based on Kansei Engineering methods, established a mapping matrix between user emotional preferences and design elements to guide the coordinated design of interface colors and motion effects.
- Final output: a set of high-fidelity interactive prototypes and design specification documents, which received recognition from the advisor and thesis defense committee.

The 8th China International College Students' "Internet+" Innovation andEntrepreneurship Competition

- Tackled low space utilization and lack of systematic design in indoor planting products under campus policies. Analyzed 20+ existing products, built 3 user personas and journey maps, identified three key pain points (space, maintenance, aesthetics).
- As project leader, coordinated 5 cross-disciplinary members, planned schedules, tracked progress, communicated with advisors, drafted core proposal content, created the roadshow PPT, and contributed to product design.
- Final deliverable: a design proposal for an indoor intelligent stackable wall-mounted planting device, which passed final acceptance and was concluded as a national-level project.

SKILLS&LANGUAGE

Languages: English(CET-4 & CET-6), Mandarin (native)
Professional Skill: Design & Prototyping: Figma, Adobe Creative Suite (Photoshop, Illustrator, InDesign, etc.), C4D,TouchDesigner

AWARDS

- 2023 Huacan Award (North China) – Third Prize
- 2022 National Undergraduate Industrial Design Competition (Shandong) – Second Prize
- 10th National Mechanical Innovation Design Competition (Shandong) – Third Prize
- 19th Shandong Provincial Mechanical & Electrical Product Innovation Competition – Third Prize
